

ScienceWorks Schools Program—Grouping Worksheet

In order to save time while at the museum, please organize your students into groups before your visit. During Team Investigations and Discovery Lab times, students need to be in teams of five led by an adult chaperone. School groups between 31 and 70 students in size will also need to organize the teams into two larger groups (we are calling them the Alpha and Beta groups). With these larger groups, half of the students will conduct investigations of specific exhibits while the other half are in the Discovery Lab. The groups will then switch. Color coded **name tags** are a great way for your students, chaperones and our staff to know each other better and help everyone remember which group they are in. The worksheet below may help make this organization scheme more clear:

Alpha Group

*If there are more than 30 students in the class, please arrange them into an additional chaperone group for the Exhibit Exploration portion of the day. These students will need to be divided among the six groups above for the Discovery Lab portion of the day. The maximum capacity of the lab is 35 students.
